PRIMARY EXAMINER

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Kemeny on May 22, 2007.

The application has been amended as follows:

In claim 1, line 7 of the claim, after "a coil", change "would" to --wound--.

In claim 1 at the end of the claim, insert --, the material of the first fixed core being different than the material of the second fixed core--.

Change the title from "Solenoid valve" to --Solenoid Valve with 2-Part Fixed Core--.

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In Figure 2, insert the label --Prior Art-- next to "Fig. 2". In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Reasons for Allowance

3. Claims 1-4 are allowed.
4. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims is a solenoid valve having the combination of a fixed core that is in two parts that are vertically coupled with the first one located in the bobbin and the second one

Art Unit: 3753

covering a lower end of the bobbin, with the material of the first one being different than the material of the second one.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cook and Modien discloses a two part fixed core. Hahn, Meisiek, and Krimmer disclose valve sheets with plate springs. Falk discloses a fixed core with ferritic stainless steel. Kazama discloses a fixed core with electromagnetic soft iron.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Bastianelli whose telephone number is (571) 272-4921. The examiner can normally be reached on M-Th (8-6:30).
